

1.0 Opening the Example

Example Path: <Public Documents>\National Instruments\<NI VeriStand 20xx>\Examples\OPAL-RT\Power Electronics Add-On\Three Phase Rectifier\Project\Three Phase Rectifier.nivsproj

- Before making changes to the original example, consider creating a backup copy of the project by copying and pasting the example folder to another directory (such as the Desktop).
- Open VeriStand and select **Open Legacy Project** on the Main screen.
- Browse to the copied example folder and select the **Legacy Project (.nivsproj)** file from the **Project** folder.

Note: If using VeriStand 2018, it is not necessary to use the **Open Legacy Project** feature. Simply navigate to the **NI VeriStand Project (.nivsproj)** file in Windows Explorer and double-click it to open the project in VeriStand.
