

Supported Circuit Editors

Before starting the real-time simulation, the electrical circuit configuration must be defined using an appropriate circuit editor. The following circuit editors are supported by the OPAL-RT Power Electronics Add-On for NI VeriStand:

- [Simscape Electrical Specialized Power Systems Simulink Blockset](#)
- [PLECS*](#)
- [PSIM*](#)
- [NI Multisim*](#)

NI Multisim, Powersim PSIM, and Plexim PLECS Blockset support has been temporarily dropped as of version 1.7.0. Please contact [OPAL-RT Technical Support](#) for more information.
