

# SM Configuration Panel

The panel has three tabs, one for each type of switches:

The screenshot shows a configuration window titled "Config\_SM\_Module\_v8-2016". At the top, there is a "Global Rail Select" dropdown menu set to "ACC". Below this are three tabs: "Discrete Switches", "Flexible Switches", and "Rotary Switches". The "Discrete Switches" tab is active, displaying a table of 30 switch configurations (0-29). Each switch is currently set to "Unconfigured". At the bottom of the table area, there is a "Power Rail" dropdown menu set to "Global". Below the table, there is a checkbox for "Enable Cable ID Protection" which is checked, and a "Required Cable ID" spinner control set to "0".
